

AKANIMO EYOMA

DATA ANALYST

PROFESSIONAL SUMMARY

Highly skilled data analyst and developer with expertise in machine learning, data visualization, and web development, leveraging technical skills to drive business results and optimize system performance.

EDUCATION

B.Sc. Information Technology

2022 – 2026

Babcock University

WORK EXPERIENCE

Data Analyst — New Horizons

Jan 2025 – Jun 2025

Completed a six-month internship in which I gained hands-on expertise in data analytics and machine learning.

- Developed machine learning models using Python libraries, resulting in improved data analysis efficiency.
- Created data visualizations and dashboards using Excel, Power BI, and Tableau, enhancing business insights.
- Utilized technical skills to drive business results, including data analytics and visualization.

CORE TECHNICAL SKILLS

Programming & Data	Python, NumPy, Pandas
Business Intelligence	Excel, Power BI, Tableau
Visualization	Matplotlib, Seaborn
Web Development	FastAPI, Streamlit
Machine Learning	KMeans machine learning model

PROFESSIONAL PROFILE

Combines data analytics, machine learning, visualization, and web development skills across academic, internship, and technical project work.

TECHNICAL PROJECTS

Crime Risk Classification System — KMeans Machine Learning Model / FastAPI

Developed a crime risk classification system using the KMeans machine learning model and deployed it over the FastAPI web framework, demonstrating expertise in machine learning and web development.

College Placement App — Streamlit

Developed a college placement app and deployed it on Streamlit, showcasing skills in web development and data analysis.

Car Price Prediction App — Streamlit

Developed a car price prediction app and deployed it over Streamlit, highlighting expertise in machine learning and data analysis.

TECHNICAL SKILLS — DETAILED

Python: Applied Python libraries in machine learning and data analysis workflows.

Data Analysis: Excel, Power BI, Tableau, NumPy, and Pandas.

Data Visualization: Matplotlib and Seaborn, alongside dashboard development using Excel, Power BI, and Tableau.

Machine Learning: KMeans machine learning model and predictive application development.

Web Development: FastAPI and Streamlit for deploying technical and machine-learning applications.

SELECTED EXPERIENCE HIGHLIGHTS

- Hands-on data analytics and machine learning experience gained during a six-month Data Analyst internship.
- Experience creating dashboards and visualizations designed to enhance business insights.
- Practical experience developing and deploying machine-learning applications through Streamlit and FastAPI.
- Combined technical skills across analytics, visualization, machine learning, and web development.

CAREER FOCUS

Data Analytics • Business Intelligence • Machine Learning • Data Visualization • Web-Based Analytics Applications
